

H1N1 Influenza - update for Parents - 18 June 2009

The Department of Health and Ageing have advised that by Friday 19 June 2009 Australia will be in the "Protect" category for H1N1 Influenza. This means that students will NOT need to be excluded for seven days upon return from their travels to infected areas or countries. However, if the student is displaying influenza symptoms the usual period of absence from school for flu is recommended.
